1.[SENSOR ALARM](#)

This product is a plastic piece on a smoke alarm. This is one of the projects of 2016. The appearance requirements are very high, and there can be no welding lines. The products are mainly ABS and PC materials.

2.[AUTO PARTS](#)

This product is a car accessories shell. This is one of the projects of 2016. The logo and the main body are firmly connected by a special process, and this is just one of the many filter housings developed by our company. The product is PP material.

3.[CORE OPENER](#)

This product is a plastic case of a nuclear opener. This is one of the projects in 2008. The product is ABS material.
